

The Consortium

A strong team of research institutes, companies and associations from Europe has been brought together for achieving the challenging objectives.

- WIP Renewable Energies, Germany
- Centre for Renewable Energy Sources, Greece
- University of Palermo, Italy
- Instituto Nacional de Engenharia, Tecnologia e Inovação, Portugal
- Ao Sol, Energias Renováveis, Portugal
- Fraunhofer Gesellschaft -Institute for Solar Energy, Germany
- Befesa Construcción y Tecnología Ambiental, Spain
- AquaMarine Power, United Kingdom
- Hellas Energy, Greece
- European Desalination Society, Italy
- Technology, Environment and Energy Research Centre, Spain
- Tinox, Germany
- Instituto Tecnológico De Canarias, Spain
- Capital Connect, Greece

Promotion of Renewable Energy for Water production through Desalination

ProDes brings together 14 leading European organisations in order to support the market development of renewable energy desalination in Southern Europe. It started on the 1st of October 2008 and it will run initially for 2 years.

ProDes is co-financed by the Intelligent Energy for Europe programme.

Promotion of
Renewable Energy
for Water production
through Desalination

Project Scope

ProDes will support the implementation of renewable energy for powering desalination through the following activities:

- Bringing closer the industry with the research community on a European level, through the establishment of an industry working group and the organisation of courses for students and professionals
- Facilitating communication and networking between the industry, investors and SMEs on the local level that will support capital flow for product development and project implementation
- Improving the framework conditions for encouraging the implementation of RE-desalination
- Creating widespread awareness about the benefits of the technology through a promotional campaign involving use of the local media

Renewable energy driven desalination technologies

Benefit from ProDes

There are opportunities to get involved and benefit from the project. We are keen to include all relevant stakeholders in our consultation process and networking activities. There are several seminars, workshops and training courses taking place within ProDes in Spain, Portugal, Italy and Greece. Our events are open to everyone.

Stay up-to-date with the latest news and get detailed information about the events that might be of interest to you through our project website:
